DETAILED ACTION

1. This Office Action is responsive to the Application filed on 08/12/2004/.

Allowable Subject Matter

2. Claims 1-3, 5-13, 15-21 allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:
4. Consider claims 1, 11, 21, the prior art, considered as a whole, neither teaches nor suggest the overall combination in a circuit for providing transmission rate compensation in a transmit path including applying an intermediate inverse transformation to generate an intermediate digital samples, interpolating the intermediate samples to generate upstream coefficients in the transmit path and an intermediate transform module applying the intermediate transform to the upstream coefficients to generate the upstream coefficients for the inverse transform module.

Such limitations, as recited in claims 1, 11 and 21, are neither anticipated nor rendered obvious by the prior art.

Claims 2-3, 5-10, 12-13, 15-20, are allowed by virtue of their dependency to base claims highlighted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
